Serial No. 09/937,151

Amendment Dated: July 27, 2004 Reply to Office Action dated April 16, 2004

Attorney Docket No. 010562,50345

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims

in the application:

<u>Listing of Claims</u>:

Claims 1-5 cancelled

6. (Currently amended) The method of claim 1 or 2, A method for

producing a potentisated homeopathic pharmaceutical product comprising

contacting said pharmaceutical product with a potentisating agent, said

potentisating agent containing a member selected from the group consisting of

bound amino acids, free amino acids, and mixtures thereof, the content of said

bound amino acids, when present, being more than 400 nmoles/L, and the

content of said free amino acids, when present, being more than 200 nmoles/L,

wherein the bound and/or amino acids are produced by adding contained in

natural, distilled fruit alcohol.

7. (Currently Amended) The method of claim 1 or 2, The method of

claim 1 or 2, A method for producing a potentisated homeopathic pharmaceutical

product comprising contacting said pharmaceutical product with a potentisating

agent, said potentisating agent containing a member selected from the group

consisting of bound amino acids, free amino acids, and mixtures thereof, the

Attorney Docket No. 010562,50345

content of said bound amino acids, when present, being more than 400 nmoles/L,

and the content of said free amino acids, when present, being more than 200

nmoles/L, wherein a fruit alcohol with a high content of amino acids is used as

the potentisating agent.

8. (Currently Amended) The method of claim 7. A method for

producing a potentisated pharmaceutical product comprising contacting said

pharmaceutical product with a potentisating agent, said potentisating agent

containing bound amino acids and/or free amino acids, the content of said bound

amino acids, when present, being more than 400 nmoles/L, and the content of

said-free amino acids, when present, being more than 200 nmoles/L, wherein a

fruit alcohol with a high content of amino acids is used as the potentisating

agent, and wherein said fruit alcohol is an alcohol from blackthorn.

Claim 9-11 cancelled

12. (Currently amended) The method of claim 6, 7 or 8, wherein said

potentisating agent contains more than 800 nmoles/L of bound amino acids

and/or more than 400 nmoles/L of free amino acids.
